

TASKS

TASK 01

Plan Your Identity Structure

2 marks

Deployment plan

Naming conventions: I will use an initial.lastname@domain.onmicrosoft.com format for email addresses. While a last name alone would often be sufficient, the first initial is added to help distinguish users who share the same surname.

Group design:

- **Development:** Microsoft 365 Groups – these support collaboration and provide access to resources such as SharePoint sites.
- **Operations:** Security Groups – these are used to grant access to resources like SharePoint sites.
- **Finance:** Microsoft 365 Groups – these support collaboration and provide access to resources such as SharePoint sites.

Principle of least privilege: This is an RBAC (Role-Based Access Control) approach that ensures users are given only the minimum permissions required to perform their tasks, and no more.

TASK 02

Create Users and Groups in Entra ID

3 marks

2a

Finance:

The screenshot shows the Microsoft Entra ID 'Users' page. The left sidebar contains navigation links: All users, Audit logs, Sign-in logs, Diagnose and solve problems, Deleted users, Password reset, User settings, Bulk operation results, Bulk operation results (Preview), and New support request. The main area displays a list of users filtered by the 'Finance' group. A search bar and filter controls are visible at the top of the list. The table shows 2 users found.

Operation:

All groups will use assigned (static) membership. This ensures that users are only granted access to the groups corresponding to their respective department and responsibilities.

However, in larger organizations where individuals frequently work across multiple departments, dynamic membership may be more appropriate.

TASK 03

Assign Initial Roles

2 marks
