

WEEK 3 VM Deployment Documentation:

3.1 Virtual Machine Deployment

Microsoft Azure

Home > Compute infrastructure > Virtual machines

Create a virtual machine

Help me choose the right VM size for my workload | Help me create a low cost VM | Help me create a VM optimized for high availability

Project details
Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Subscription: Azure for Students
Resource group: CTU-20240173-RG

Instance details

Virtual machine name: Week3VMDeploymentRuben
Region: Africa South Africa North
Availability options: Availability zone
Zone options: Self-selected zone (Default up to 2 availability zones, one VM per zone)
Availability zone: Zone 1
Security type: Trusted launch virtual machines
Image: Ubuntu Server 24.04 LTS - x64 Gen2
VM architecture: x64

This is a standard Ubuntu Linux Deployment within the South Africa North region

3.2 Network Configuration

Home > Compute infrastructure > Virtual machines

Create a virtual machine

Help me choose the right VM size for my workload | Help me create a low cost VM

Basics | Disks | **Networking** | Management | Monitoring | Advanced | Tags | Review + create

Define network connectivity for your virtual machine by configuring network interface card (NIC) settings. You can control ports, inbound and outbound connectivity with security group rules, or place behind an existing load balancing solution. [Learn more](#)

Network interface
When creating a virtual machine, a network interface will be created for you.

Virtual network: TechBridgeVN
Subnet: DevFront (10.0.0.0/24)
Public IP: (new) Week3VMDeploymentRuben-ip
NIC network security group: None, Basic, **Advanced**

Configure network security group: (new) Week3VMDeploymentRuben-nsg

Delete public IP and NIC when VM is deleted: ☐

Enable accelerated networking: ☒

Load balancing
You can place this virtual machine in the backend pool of an existing Azure load balancing solution. [Learn more](#)

Load balancing options: **None**, Azure load balancer, Application gateway

3.3 Auto-Shutdown Configuration

Auto shutdown configuration is at 7pm, it is a reasonable time have the VM be powered down at most workers do not work that late

3.4 Documentation
