Assigning a role at the subscription level grants the user permissions across the entire subscription, while assigning it at the resource group level restricts access to only the resources within that specific resource group.

In this case, limiting user-ops (Arthur) to the resource group scope ensures he can only manage resources inside that group. This prevents him from making changes to other resource groups or resources outside his designated area, thereby properly enforcing the principle of least privilege.

Task 2 — Network Security Group

Direction	Port / Protocol	Source / Dest	Action	Business Justification
Inbound	3389	Specific IP	Allow	Remote management of VM
Inbound	80 ,443	Any	Allow	Web application access
Inbound	Any	Any	Deny	Least-privilege default — block all other inbound
Outbound	443	Internet	Deny	Prevent data exfiltration from VMs

Inbound:

Filter by name						
Port == all Protocol == all Source == all Destination == all Action == all						
Priority ↑↓	Name ↑↓	Port ↑↓	Protocol ↑↓	Source ↑↓	Destination ↑↓	Action ↑↓
☐ 100	RemotemanagementofVM	3389	Any	10.0.0.0/16	Any	✔ Allow
☐ 110	Webapplicationaccess	80,443	Any	Any	Any	✔ Allow
☐ 120	⚠ Leastprivilegedefault	Any	Any	Any	Any	✖ Deny

Outbound:

Priority ↑↓	Name ↑↓	Port ↑↓	Protocol ↑↓	Source ↑↓	Destination ↑↓	Action ↑↓
☐ 130	PreventdataexfiltrationfromV...	443	Any	Any	Any	✖ Deny

Task 3:
